Summary

Full-Stack Developer and Data Operations Engineer with hands-on experience shipping production REST APIs, automating data workflows, and managing high-volume operational pipelines. Proficient in **Python, SQL, Advanced Excel, Power BI**, and the **MERN Stack**, with a track record of cutting processing time and error rates through workflow automation. Completed **15+ certifications** and **5 corporate job simulations** (Tata, Deloitte, Accenture, PwC, KPMG). Actively upskilling in Data Analytics (Power BI, Pandas, SQL, DAX) and System Design.

Core Skills

- **Languages & Backend:** Python, JavaScript (ES6+), Java, SQL, Node.js, Express.js, REST APIs, JWT Auth, System Design, Data Structures & Algorithms
- **Data & Analytics:** Advanced Excel (Pivot Tables, VLOOKUP, Macros), Power BI, Pandas, Matplotlib, scikit-learn, Google Sheets, Tally ERP, Data Cleaning & Reporting
- **Frontend & Tools:** React.js, HTML5, CSS3, Bootstrap, Firebase, Docker, Git, GitHub, Vercel, Render, Postman, CI/CD
- **Operations:** SLA Compliance, JIT Operations, Inventory Analytics, Workflow Automation, Vendor Coordination, QA, Root-Cause Analysis

Experience

Associate – Technical Operations

Lenskart.com

May 2025 – Present

Gurugram, India

- **Cut operational processing lag by 30%** by standardizing data entry workflows and building Excel validation dashboards for high-volume daily transaction pipelines.
- Maintained **100% SLA compliance** across inventory cycles via real-time anomaly flagging and cross-team coordination; reduced stock discrepancies by **20%** using Tally ERP and Pivot Table reports.

Freelance Full-Stack Developer

Fiverr

Sep 2025 – Apr 2026

Remote

- Delivered **10+ production projects** end-to-end using Node.js, Express.js, Firebase, and REST APIs, reducing client data access latency by **40%** through caching and query optimization.
- Automated reporting workflows for **3 SMB clients**, eliminating **8+ hours/week** of manual data processing via Firebase real-time dashboards and scheduled Python scripts.

Digital Marketing & Data Ops Intern

InAmigos Foundation (IAF)

Apr 2026

Remote

- Boosted campaign engagement by **20%** by analyzing social media KPIs in Google Sheets and refining targeting; maintained live dashboards tracking **5+ metrics** across a 4-week sprint.

Web Developer

Advert Web India — TECH-A-INTERN — OctaNet — YBI Foundation — CodSoft

Nov 2023 – Feb 2025

India & Remote

- Shipped full-stack features across **5 organizations** simultaneously – integrated REST APIs, built CRUD pipelines, and cut form submission errors by **35%** via client-side validation in Node.js and MySQL.

Projects

Stock Price Prediction ML Model | Python, scikit-learn, Pandas, Matplotlib

- Trained regression model on **5+ years** of market data achieving **87% directional accuracy**; built analytics dashboard cutting manual analysis time by **60%**.

Full-Stack To-Do Manager (MERN) | React, Node.js, MongoDB, JWT, Render

- Built production CRUD app with JWT-secured REST API and CI/CD on Render; cut API response time by **45%** via indexed MongoDB queries and Express middleware caching.

Firebase Secure File Transfer Platform | JavaScript, Firebase Storage & Auth

- Engineered real-time file sharing platform with role-based access control – achieved **zero unauthorized access incidents** across concurrent multi-user sessions.

Live Weather Forecast Dashboard | HTML, CSS, JavaScript, OpenWeatherMap API

- Built real-time weather app with 5-day forecasting and API response caching, improving load performance by **50%** by eliminating redundant network calls.

Education

Diploma in Computer Science and Engineering

Maharshi Dayanand University – DPG Degree College

2023 – 2026 (Completed)

Gurugram, Haryana

- Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Web Technologies

ADCA — DCA — Computer Applications

Completed

- Covered MS Office, Tally ERP, C Programming, and Internet Applications

Certifications & Achievements

- **Certifications:** Google IT Automation with Python (Coursera) • IBM Data Science Professional (Coursera) • Full-Stack Web Development (Udemy) • Digital Marketing (Google Garage) • MS Excel (Desk Bright) • SEO (Udemy & Digital Sandeep Academy)
- **Job Simulations:** Engineering & Data Analytics tracks – Tata Group, Deloitte, Accenture, PwC, KPMG
- **Competitive Programming:** 150+ LeetCode problems solved (Arrays, DP, Graphs, Greedy, Two Pointer, BFS/DFS) • Active on Codeforces
- **Hackathons:** Delivered working prototypes in 5+ hackathons within 24–48 hour constraints
- **Leadership:** Founder, Unknown Esports (2018–2022) – managed teams, tournament operations, and community scaling for 4 years
